OBJECTIVE

Frontend Developer with a strong background in testing, skilled in HTML, CSS Javascript, Typescript and Angular. An enthusiastic learner aiming to build innovative, user-friendly web applications and grow as a frontend professional.

EXPERIENCE

Software Engineer - Onnet Systems India Pvt Ltd

October 2024 – present

- Developed responsive and interactive user interfaces using HTML, CSS, JavaScript, TypeScript, and Angular.
- Designed and implemented reusable UI components, improving efficiency and consistency across projects.
- Conducted functional, regression, and UI testing to ensure product stability and quality.
- Integrated RESTful APIs into Angular applications to display and manage dynamic data.
- Utilized Jira for task management, bug tracking, and effective collaboration with cross-functional teams.

PROJECTS

MyCloudCam

- A cloud-based Network Video Recorder (NVR) solution designed for IP surveillance systems.
- Allows users to connect and manage IP cameras, store surveillance footage securely, and access live or recorded videos from anywhere.
- Provides web console, mobile app, and subscriber access, enabling video/audio recording and playback in the cloud.

Drrived(Cloud Storage Platform)

- A secure, high-performance cloud storage solution for users to upload, organize, and manage files of any type.
- Provides web and mobile platforms for seamless access to files anytime, anywhere.
- Includes an admin console for subscriber management and supports creating monthly and yearly subscription plans.
